Ahmad Haziq Mu'izzaddin Wafiq

Student at Pesantren PeTIK 2 Jombang
East Java, Indonesia

Summary

Hello my name is Ahmad Haziq Mu'izzaddin Wafiq But, you can call me Haziq for short.

I am an assertive student with strong motivation. It's not easy for me to give up on a difficult problem. When it comes to difficult questions, I usually ask my friends who have more experience than me for insight to solve the problem.

I love to code, write and analyze. I'm not a very good programmer, and I push myself to be good at it.

You can discuss almost anything with me. Such as the future, the technology industry, self-development, history, politics, religion, local culture and many more.

Although I'm leaning more towards programming. I am also active in the website development team of Pesantren PeTIK II Jombang. In team work, I am one of the deadline oriented people. Getting things done, is the best method of doing things at work. At least for me.

Where did I learn all this? You can mention it. Schools, organizations, Islamic boarding schools, friends, and of course Google.
